

WEEK 6 & 7 PROJECT REPORT

Ludo Star Game Using Java

Student Information

Name: Maisha Jaman Mahi

ID: 11240321722

Project Title: Ludo Star Game

Course: Software Development I

Week 6 & 7

1. Introduction

In Week 6 and Week 7, the main focus was implementing the Ludo game rules and multiplayer functionality. The game was improved to support multiple players and to manage the different rules required during gameplay.

2. Objective

The main objectives of Week 6 and Week 7 were:

- Implement the basic Ludo game rules.
- Add safe zones and token capture.
- Implement the home path.
- Provide extra turns when rolling a 6.
- Support 2–4 players.
- Manage player turns and synchronization.

3. Week 6 & 7 Work Completed

During Week 6 and Week 7, the following tasks were completed:

- Implemented safe zones.
- Added token capture functionality.
- Implemented the home path.
- Added extra turns when a player rolls a 6.
- Implemented multiplayer logic.
- Added support for 2–4 players.
- Managed player turns during the game.

4. Coding Progress

The Ludo rules and multiplayer system were successfully implemented. The game can now handle multiple players and apply important Ludo rules during gameplay.

Current implemented features:

- Safe zones
- Token capture
- Home path
- Extra turn on rolling 6
- 2–4 player support
- Player turn management

5. Challenges Faced

- Managing the rules during token movement.
- Handling multiple players and their turns.
- Synchronizing the game state between players.

6. Conclusion

Week 6 and Week 7 focused on implementing Ludo rules and multiplayer functionality. The game was improved with important gameplay rules and support for multiple players, making the game more complete and interactive.
