

WEEK 10 PROJECT REPORT

Ludo Star Game Using Java

Name: Maisha Jaman Mahi

ID: 11240321722

Project Title: Ludo Star Game

Course: Software Development I

1. Introduction

In Week 10, the main focus was completing the documentation and final presentation of the Ludo Star Game. The completed project was reviewed and the important development work was organized for the final report. UML diagrams and code documentation were prepared to explain the structure and working process of the game. The final demo was also prepared to present the completed game and its features.

2. Objective

The main objectives of Week 10 were:

- Complete the final project report.
- Prepare UML diagrams for the project.
- Add documentation and explanations for the code.
- Prepare the final project demonstration.
- Review the completed features of the game before the final presentation.

3. Week 10 Work Completed

During Week 10, the following tasks were completed:

- Completed the final project report.
- Prepared the UML class diagram for the Ludo Star Game.
- Added documentation and explanations for the important parts of the Java code.
- Organized the project features for the final presentation.

- Prepared the final demo of the Ludo Star Game.
- Reviewed the completed game before the final presentation.

4. Coding Progress

The main coding work of the project was completed in the previous weeks. In Week 10, the focus was mainly on documenting the completed code and preparing it for the final presentation.

The documented project features include:

- Ludo game board and token system.
- Dice rolling and player turn management.
- Token movement and home path.
- Safe zones and token capture.
- Multiple-player support.
- Player and color selection.
- Game animations and sound effects.
- Game notifications and status display.
- Winner detection and winner display.
- New Game and lobby system.

The UML class diagram was prepared to show the main classes of the project and the relationships between them.

UML Class Diagram

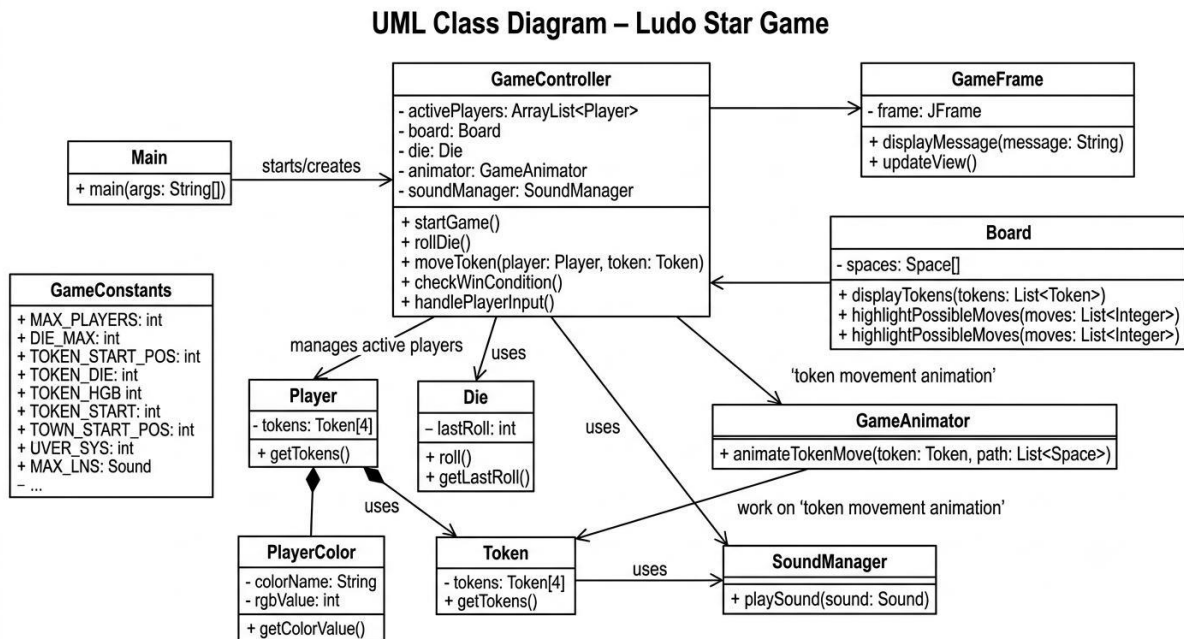

Figure 1: UML Class Diagram of Ludo Star Game

The UML diagram represents the main classes used in the project and shows how they interact with each other. It helps explain the overall structure of the Java application and makes the code organization easier to understand.

5. Challenges Faced

The following challenges were faced during the documentation and final preparation:

- Organizing all project information for the final report.
- Preparing a UML diagram that correctly represents the project structure.
- Documenting the important parts of the Java code clearly.
- Organizing the completed features for the final presentation.
- Preparing the completed game for the final demonstration.
- Reviewing the project to make sure the final presentation was ready.

6. Conclusion

Week 10 focused on the final documentation and presentation of the Ludo Star Game. The final report, UML class diagram, and code documentation were prepared to explain the development and structure of the project. The final demo was also prepared to demonstrate the completed game and its features. With the documentation and presentation prepared, the Ludo Star Game project reached its final stage.
